KAHLEN ONG

Applied AI & Analytics Student

Second-year Applied AI & Analytics student (cGPA: 3.73/4.0) with strong foundations in Python, web development, REST APIs, AI concepts, and hands-on experience building backend and frontend features. I bring a disciplined, team-oriented mindset, with proven ability to ship small features, document clearly, and solve problems methodically in real-world projects.

Education

Diploma in Applied AI & Analytics
Nanyang Polytechnic
April 2025 - April 2028 (Expected)

GCE O-Level
Paya Lebar Methodist Girls' School
January 2021 - December 2024

Skills

- Python, SQL
- PowerBI, SAS Viya
- HTML, CSS, JavaScript
- React, Next.js
- Time Management
- Presentation Skills

Activities

Nanyang Polytechnic:

- **2026 - Present:**

Publicity Subcommittee of NYP Cloud Computing

- **2025 - Present:**

Member of Mentoring Club

PLMGS:

- **2021 - 2024:**

Secretary of Media & Information Technology Club

- **2021 - 2024:**

Member of Prefectorial Board

Professional Experience

January 2026 - Present

Assistant Taekwondo Coach

Sabertooth Taekwondo

- Coached and managed a group of around 20 students per class, delivering structured and engaging training.
- Planned and led sessions focused on discipline, technique, and confidence-building in a safe, motivating environment.
- Provided individual guidance to help both beginners and advanced students progress consistently.
- Achieved a 25% gold medal rate and an overall 80% medalist rate among competitors under my coaching.
- Improved student retention, grading success, and long-term commitment through consistent leadership and mentoring.

Certifications

- AI Capabilities and Limitations - 2026
- AI Fluency for Students - 2026
- Basic Proficiency in KNIME Analytics Platform - 2026
- Building with the Claude API - 2026
- Claude Code in Action - 2026
- Introduction to Claude Cowork - 2026
- Claude Code 101 - 2026
- Claude 101 - 2026
- AI4I® – Literacy in AI - 2026
- AI Fluency: Framework & Foundations - 2026
- SnowPro Associate: Platform Certification - 2025
- User Experience Design Fundamentals - 2025
- Web Development Fundamentals - 2025

Awards

- Director's List (AY26/27 Semester 1) - 2026
- Distinction in Responsible AI for Sustainability - 2026
- Distinction in Data Wrangling - 2026
- Edusave Certificate of Academic Achievement - 2026
- AWS GenAI CloudQuest Tournament - Winner, 2026
- National AI Student Challenge - Winner, 2026
- Distinction in Business Innovation & Enterprise - 2025
- PL Excellence Award (Merit) - 2024
- Paya Lebar Methodist Church 90th Anniversary Award - 2022
- Dean's List Award (Character Excellence) - 2021
- Edusave Character Award (ECHA) - 2021

Technical Proficiency

Languages

- Python
- SQL
- HTML
- CSS
- JavaScript

Frameworks & UI

- React
- Next.js
- Flask
- Tailwind CSS
- Boostrap
- MUI

Databases

- SQLite
- Firestore (NoSQL)

AI & Analytics

- Scikit-learn
- Vertex AI
- KNIME
- SAS Viya
- Power BI

Cloud & Tools

- Git
- GitHub
- Firebase
- Google Cloud
- Alibaba Cloud
- Gunicorn
- Nginx

Projects

June 2026 - August 2026

FactorIQ (Facility Management System)

Next.js • Firebase • Firestore • Scikit-learn • Vertex AI

- Developed the facility management module for environmental monitoring, HACCP compliance, incident management, and zone monitoring.
- Designed Firestore (NoSQL) data structures for real-time sensor data, compliance logs, incidents, and predictive alerts.
- Built Scikit-learn predictive alerts to forecast environmental threshold breaches.
- Integrated Vertex AI for image-based pest and hygiene detection with automatic incident creation.
- Implemented Telegram alerts and escalation workflows for critical and unresolved incidents.

July 2026 - August 2026

Gym Calories Predictive Analytics

KNIME • SAS Viya • Predictive Modelling

- Cleaned and transformed a 4865-record dataset in KNIME for predictive analysis.
- Built and compared Linear Regression, Decision Tree, Random Forest, and Gradient Boosting Models in SAS Viya using Model Comparison.
- Evaluated model performance using validation ASE, selecting Gradient Boosting as the lowest-error model.

July 2026

Customer Data Wrangling & Analytics

KNIME • Data Cleaning

- Integrated and cleaned 1506 customer records from 4 regional datasets into a consistent, analysis-ready dataset for downstream analysis.
- Applied validation, feature engineering, and anonymisation, including age & income grouping, SSN hashing, and name masking.
- Produced customer spending insights through grouped analysis and visualisation.

April 2026

A-Level Motivation Web App

HTML • Tailwind CSS • JavaScript • Firebase

- Built an interactive Web App with Firebase Authentication, profiles, and persistent user data.
- Developed mood-based motivation, a shared message board, and a timed mini-game to boost engagement.
- https://motivationalboard.netlify.app/

October 2025- February 2026

Bridgify (Event Management & Booking System)

Flask • SQLite • FullCalendar • Jinja2 • JavaScript

- Developed a full-stack event management and booking system with calendar-based browsing, search, and capacity-controlled registration.
- Designed an SQLite relational database and Flask APIs for bookings, withdrawals, and admin CRUD operations.
- Implemented RBAC, validation, and event suggestion workflows, including duplicate-registration and past-event safeguards.
